PERSONAL PORTFOLIO

Portfolio Highlights (URL: paging-ryan.com)

June 2024 – Present

- Deployed NLP techniques to analyze 200⁺ songs (75K⁺ words) from 1949-2024 and developed visualizations with Python, showing how artists, topics, and sentiment have evolved across decades of country music.
- Researched the 10-Year Breakeven Inflation Rate and Oil Price fluctuations, combining time series techniques to build descriptive and predictive models that deepen understanding of monetary policies spanning 2018 to 2026.
- Built custom movie datasets and implemented a pairwise comparison algorithm to analyze 1.45K⁺ head-to-head preferences, developing Random Forest and XGBoost machine learning models to predict rewatch desire.
- Designed an LLM sentiment analysis framework to process Google Store reviews of digital brokerages, showing how AI models can identify common user praise and criticism dealing with mobile UI/UX functionality.
- Mapped the location of 54K⁺ artistic manhole covers across the city of Seattle using an interactive Tableau dashboard that blends geospatial visuals with storytelling to spotlight an overlooked form of public art.

PROFESSIONAL EXPERIENCE

PricewaterhouseCoopers – New York, NY

January 2022 – June 2024

Senior Data Scientist, Financial Crimes Unit (July 2023 – June 2024)

- Mentored a team of 5 data scientists, contributing to improved data-driven decision-making across the team.
- Advanced a SAS fraud network algorithm that identifies customers associated with victims of identity theft, which accelerated the completion of 12K SARs and helped the client avoid \$600M in regulatory fines.
- Developed Python applications to auto-populate case narrative report fields weekly for 450⁺ newly opened fraud activity cases, reducing fraud investigation and regulatory filing processing times by 85%.
- Managed bulk processing of 4.7TB of data using partitioning techniques in SAS to compute rolling sums for attempted transactions, identifying ~33,000 high-priority alerts from a backlog of ~1.3 million alerts.

Experienced Data Scientist, Financial Crimes Unit (January 2022 – June 2023)

- Assisted investigators working a backlog of ~1.3 million alerts by automating processes with PL/SQL queries.
- Utilized SSIS to build data pipelines, enabling APIs to efficiently access data from centralized repositories.
- Designed Tableau dashboards to highlight vulnerabilities in the fraud controls of an AI-driven lending platform.
- Conducted pre-production QA reviews of Zelle dispute handling SAS scripts, preventing critical errors in production and ensuring regulatory compliance.

Ernst & Young – New York, NY

January 2021 – January 2022

Data Scientist, Indirect Tax Technology

- Collaborated on tax engine development using C#, LINQ, and T-SQL, ensuring compliance with free trade agreements while lowering incurred cross-border import taxes on procured assets from Canada and Mexico.
- Built Python-based OCR pipeline that uses supervised machine learning to process transaction documents, achieving ~87% confidence for extracted line items and providing client insights into procurement costs.
- Automated transaction reporting with Alteryx, curating 25.6GB of monthly data for a shipping courier.
- Implemented CapEx. and Fixed Asset forecasts, enhancing long-term planning in asset procurement.
- Prepared Power BI visuals showcasing tax benefits to clients on their asset procurement.

JC Jones – Rochester, NY

March 2020 – November 2020

Data Analyst Intern

- Created a supervised classification model in R to detect credit card fraud anomalies, reducing net false positives.
- Visualized payroll and equity changes using Tableau, identifying anomalies in an insider trading investigation.
- Constructed a routing algorithm to determine and visualize the most efficient drives to ~1.2K client sites.

Catholic Family Center - Rochester, NY

June 2020 – September 2020

BI Engineer Intern

- Volunteered during COVID-19 to streamline FP&A reporting with Excel macros, helping secure New York State grants for high-risk communities impacted by the pandemic.

Office of the New York State Comptroller - Rochester, NY

January 2020 – March 2020

Data Analytics Instructor

- Taught Python training sessions to 50⁺ data analysts on best practices for state audits.

EDUCATION

SIMON BUSINESS SCHOOL, UNIVERSITY OF ROCHESTER - Rochester, NY

July 2019 – May 2020

Master of Science in Business Analytics (Cumulative GPA: 3.74/4.00)

- Merit Scholarship Recipient (GRE Score: 322)
- Graduate Teaching Assistant for Data Mining and Options, Futures, and Derivatives

UNIVERSITY OF ROCHESTER – Rochester, NY

August 2015 – May 2019

Bachelor of Science in Business (Business Analytics and Finance)

Bachelor of Arts in Philosophy; Minor in Legal Studies

- Graduated with Highest Distinctions | Continuing Student Scholarship (2017, 2018) | NSF Grant Recipient (2018)
